

2nd March 2006 Technograph Microcircuits Ltd

Technograph, manufacturers of advanced electronics for

demanding applications, exhibited at Culham for the first time recently. They demonstrated a wide range of technology from thick film substrates, chip and wire, PCB assembly and box build. The company has already made one product for JET and makes many products for Space and Defence applications as well as other technically demanding markets.

Steve Edwards, Sales Manager said, "Great interest was shown in the display and some useful contacts were made for future projects. Technograph have already committed to come again next year."

21st March 2006 Joint Exhibition by Goodfellow Cambridge Ltd and Pulse Power and Measurement Ltd

Goodfellow Cambridge Ltd

For the first time in several years, Goodfellow Cambridge Limited exhibited at Culham Science Centre in a joint foyer exhibition with Pulse Power and Measurement Ltd.

Goodfellow Cambridge has many customers at

the site and so an exhibition of this type is a cost effective way to meet both existing and potential customers and demonstrate their range of metals and materials for research and industry.

The exhibition met all expectations and Goodfellow looks forward to attending another foyer exhibition early in 2007.

For further information contact 01480-424835, e-mail: dearlove@goodfellow.com or visit www.goodfellow.com

Pulse Power and Measurement Ltd

Pulse Power and Measurement Ltd took this opportunity to present their full range of products at Culham. "The exchange with engineers and scientists from UKAEA and the other businesses that share this site, was of a particularly high quality this year," said Sales Manager, Dave Willford. "New

developments and upgrades taking place at Culham have presented us with a number of new commercial opportunities for our Power Supply, Pulsed Power and Power Electronics businesses. There was notable interest this year in our high voltage 30-50kW modular power supplies and the ABB range of Power Semiconductors."

For further information contact 01793 784 389, e-mail: dwillford@ppm.co.uk or visit www.pppmpower.co.uk

30th March 2006 TWI Ltd

TWI Ltd, one of the world's foremost research and technology organisations, exhibited at Culham for the first time. The Culham division of UKAEA has been an industrial member of TWI since 2005. This provides staff with technical support in welding, joining, NDT, surfacing, coating and cutting. Other services

include confidential contract R&D, technical information, advice, technology transfer, training and qualification.

"We had a lot of interest in the full range of fabrication and joining technologies on offer," said Chris Bagley, Programme Manager for TWI's Power Industry Sector. "Enquiries ranged from the joining of very thick section structures in complex alloys to

the application of nano-scale coatings on polymers. We were able to provide suggestions for solutions to a number of challenges faced by Culham staff and hope to carry out some exploratory work in the very near future "

For further information contact 01223 891162, e-mail: twi@twi.co.uk or visit www.twi.co.uk

4th April 2006 National Instruments

At a recent Showcase at Culham, National Instruments exhibited a range of the latest technologies they have to offer including LabVIEW 8 with the new project approach.

Ralph McFadyen, Field Sales engineer

said, "As always, exhibiting at Culham proved to be a very worthwhile event for us. It was good to meet new people at the Science Centre and to meet people who we otherwise may not be able to contact. We also find it interesting to get feedback from customers who are already using our products."

For further information contact - tel: 01635 572400 or e-mail: ralph.mcfadyen@ni.com or visit www.ni.com/uk.

11th May 2006 Metalcraft

Metalcraft who supply various large containment and structural components as well as cryogenic, vacuum and pressure vessels to a range of industries

including power generation, oil and gas, process, environment, and high technology sectors had a successful first exhibition at Culham Science Centre.

They are looking forward to the opportunity to exhibit in the future and welcome the opportunity to support companies involved in the ITER project to ensure that the UK makes a full contribution to this ground breaking research.

Barry Gelder, Business Development Engineer said "We found the exhibition a great opportunity to meet with potential new customers and explain the breath of knowledge and experience Metalcraft have to offer the scientific and research communities."

For further information contact Barry Gelder, tel: (0)1354 692391, e-mail: b.gelder@metalcraft.co.uk or visit www.metalcraft.co.uk

23rd May 2006 Essex X-Ray

Essex X-Ray, leading manufacturers and suppliers of High Voltage components and cast resin products, exhibited at Culham recently. They displayed a range of high voltage cable, interconnects, diode rectifiers, surge arrestors, resistors and custom cast resin products including Neutron absorption panels.

Steve Mountain, Sales Manager from Essex X-Ray, said, "We welcomed the opportunity to meet Culham staff and discuss their requirements with them, and

we made a number of new contacts with interesting applications. Of particular interest for the various projects discussed were special cables, HV rectifiers and Neutron shielding. We look forward to visiting Culham again."

For further information please contact - Tel: 01371 875661 or email sales@essex-x-ray.com or visit www.essex-x-ray.com/essex.htm

ITER Business Opportunities

Interested in learning more about ITER and ITER procurement? Don't forget the ITER Event at Culham Science Centre on June 28/29th 2006. For more details visit www.fusion.org.uk/industry.

Future Exhibitions at Culham

TM Engineers	6th June 2006
Intellikraft	20th June 2006
Technology and Innovation Exhibition 2006	29th June 2006
Schroff UK/Lee Dickens (joint)	6th July 2006
