

## 2nd December 2004 Fischer Connectors

**Fischer Connectors held their second exhibition at Culham recently. A number of interesting enquiries were taken on the day and they expect to continue receiving enquiries in the coming months as a result of their efforts.**

Yvan Atkinson, Sales Manager said, "The chance to exhibit at Culham gives us the perfect opportunity to meet

existing personnel and new prospects with both UKAEA staff and the many new companies who have moved on site over the years who have an interest in our connectors."

**For further information please contact Yvan Atkinson on 023 9245 9600, e-mail: [yvan.atkinson@wwmail.co.uk](mailto:yvan.atkinson@wwmail.co.uk) or visit [www.fischerconnectors.co.uk](http://www.fischerconnectors.co.uk)**

## 12th January 2005 eXception Group (formerly DDi Europe)

**This was the first exhibition of 2005 and a first time for eXception**

**Group (previously DDi Europe) to showcase at Culham. On the day, discussions were positive and some potentially very good leads were forthcoming from the JET, MAST and Innovation Centre companies at Culham.**

eXception Group is at the leading edge of PCB technology with its highly complex multi-layered rigid and flex-rigid boards and intricate board assemblies. CommaTECH complements this with its custom enclosure and metalwork manufacture facility and is

renowned for its technical capability and precision work.

Sales Managers Chris Salter and Garry Myatt both agreed that the showcase at Culham had been extremely worthwhile. They would be pleased to hear from anyone who was unable to attend on the day to discuss their PCB/PCBA and metalwork related programs.

**For further information please contact eXception Group - Tel: 01684 292448 or CommaTECH - Tel: 01992 414333, e-mail: [garry.myatt@eXceptionpcb.com](mailto:garry.myatt@eXceptionpcb.com) or [www.eXceptiongroup.com](http://www.eXceptiongroup.com)**

## 26th January 2005 Responsive Engineering

**Responsive Engineering exhibited at Culham for the second time in January. Both Peter Bernard, Group Managing Director, and Graham Metcalfe, Sales Engineer for Kingsway Precision, were delighted to talk to the many visitors to their stand which displayed a range of products from the four companies within the group; Weldex - Specialist Welding & Precision Fabrication, Streamline - Waterjet & Laser Cutting, Pressex Pressed Components - Prototype and Production and**

**Kingsway - Precision Machining and Engineering.**

Peter Bernard said, "We find this type of exhibition enables us to display and explain to our customers the wide and diverse range of products the group is capable of producing. We took a number of interesting enquiries both on the day and in follow-ups. It was especially pleasing to receive some excellent feedback from a recent project, a FEID jig that Responsive Engineering supplied to UKAEA. This form of exhibiting is extremely valuable to Responsive Engineering personnel and we hope to repeat it next year."

**For further information please contact Peter Bernard on 0191 497 3401, e-mail: [peter.bernard@responsive-engineering.com](mailto:peter.bernard@responsive-engineering.com) or visit [www.reponsive-engineering.com](http://www.reponsive-engineering.com).**

## 9th February 2005 Accles & Pollock

This was the second occasion that Accles & Pollock have displayed their many skills in tube bending, coiling, and welding at Culham. As on their previous visit, their display attracted a wide variety of

enquiries and enabled them to discuss a variety of topics with engineers and technicians on site. In fact these discussions have led to Accles & Pollock entering into further dialogue on at least two projects and they are hopeful that their current involvement with Culham projects will expand.

Malcolm Edwards, Technical Sales Manager for Accles & Pollock, said, "Over the last 12 months Accles & Pollock have developed a very good working relationship with a number of UKAEA personnel. We are about

to deliver the final stage of a coiled pipe assembly, part of a contract awarded in 2004. Together with the major CERN contract, which was awarded to us in 2002, this type of work has established Accles & Pollock as a company who are able to work in partnership with its customers in the development and manufacture of unique tubular engineering products."

For further information please contact Malcolm Edwards on 0121 543 2171, e-mail: [m.edwards@accles.co.uk](mailto:m.edwards@accles.co.uk) or visit [www.accles.co.uk](http://www.accles.co.uk).

## 23rd February 2005 LPKF Laser & Electronics Ltd

LPKF Laser & Electronics Ltd exhibited at Culham for the first time in February. LPKF are world leaders in circuit board plotters for producing in house PCB's directly from CAD data without chemicals. This exhibition provided them with an excellent opportunity to present the new ProtoMat S62 - a compact and automated

system delivering auto tool change and a motorized Z-axis.

LPKF have also pioneered a range of Production Laser systems for precision drilling/cutting and 3D-MID circuits, which proved of great interest to engineers who use specific materials such as polymers and ceramics.

Colin Purton, LPKF's EDA Systems Manager said, "We had an excellent day meeting engineers with some interesting technical queries that we were able to address with a hands on demonstration".

For further information please contact: Colin Purton on 01344 455046, e-mail: [info@lpkf.co.uk](mailto:info@lpkf.co.uk) or visit our web site: [www.lpkf.co.uk](http://www.lpkf.co.uk)

### Visitors' Book

*"This form of exhibiting is extremely valuable to Responsive Engineering personnel and we hope to repeat it next year."*

Peter Bernard,  
Responsive Engineering.

*"The chance to exhibit at Culham gives us the perfect opportunity to meet existing personnel and new prospects with both UKAEA staff and the many new companies who have moved onto the site who have an interest in our connectors."*

Yvan Atkinson,  
Fischer Connectors.

*"On the day, discussions were positive and some potentially very good leads were forthcoming from the JET, MAST and Innovation Centre units at Culham."*

Chris Salter and Garry Myatt,  
eXception Group.

## Future Exhibitions at Culham

Thermo Vacuum	6th	April	2005
Thames Cryogenics	20th	April	2005
Technology Exhibition	5th	May	2005
Sandvik Materials	10th	May	2005

If your company would like to stage an exhibition at Culham please contact [deniese.willis@ukaea.org.uk](mailto:deniese.willis@ukaea.org.uk) or call 01235 466608.
